ELECTRICAL SERVICES

Why Choose Electrilogix

Complete Design-to-Build Service

From concept to finished panel

CSA Field Evaluations

Approved equipment, delivered with confidence

Quality & Safety First

Built to our stringent internal quality standards, the CEC and CSA standards

Fast, Flexible Turnaround

Keep your project on schedule

Collaborative Approach

We work directly with OEMs, Machine Builders, and End Users to meet unique requirements

Delivering Code-Compliant, CSA Approved Solutions that Keep Your Equipment Running Safely & Efficiently

Electrilogix is a **Waterloo-based licensed electrical contractor** with over 30 years of experience in the electrical industry, designing, building, and servicing industrial control and motor control panels. Our background spans machine wiring and panel building, electrical construction, electrical design and project support, plant maintenance, and electrical quality control at a CSA approved manufacturer—giving us a uniquely well-rounded perspective on every project. This broad foundation allows us to deliver high-quality, precision work that's done right the first time.

Design Services & CSA Field Evaluations Available – We can assist with complete panel design and arrange on-site CSA field evaluations to help your panels achieve Canadian certification quickly and smoothly.
